

## Music Consoles from GRUNDIG and GRUNDIG-Majestic in the RMorg.

- There are variants following from the [basic type](#) 7000:
- 
- 7000 home land (D) [Zeichnungsnummer 2042](#)
- 
- [7000 USA Z.# 2042-100](#)
- 7000 S (SEMKO, swedish) Z # 2042-200
- 7000 I (Italy) Z# 2042-300
- 7000 WE (Export at the time only of AM) Z# 2042-500
- 
- 
- 7015 home land (D) [Z # 2043](#)
- [7015 USA Z # 2043-100](#)
- 7015 WE Z # 2043-200
- 7015 S (SEMKO, swedish) Z # 2043- 300

The home land's numbers and USA numbers are [with](#) both types identical in the index. The other ones are after Ordered-or incoming orders in the index number. That is supposed to show, there was not over there YET any system.

### **The circuits are at booth types are the same or on the same leaf**

In the RMorg. there is one among **ID 2167** 7000 (bright)

There the circuits lie of the Home Land- and USA model.

Under **ID 2166** a 7000 (dark) lies there only the USA switching.

Under **ID 2168** a 7015, there the circuits lie again of the Home Land- and USA model

To the other models it gives with me no documents here.

.

It is in the RMorg. therefore the two circuits, home land and USA available.

Hans M. Knoll
